

Personally Administered Items

Please find enclosed a list of the current items which the Prescription Pricing Division (PPD) has deemed to be “personally administered items”. This means that you will be reimbursed VAT automatically from the PPD on any item within the list based on the reimbursement price and not the purchase price. These items should be removed from your claims to the HMRC, although there is much debate regarding certain items, e.g: insulin, with a current loophole enabling dual reimbursements of VAT.

Description	Pack Size
